Some things you should know about our Organic Gluten-smart Crust.

This crust has been manufactured in a strictly gluten-free facility and is made with tapioca starch, whole grain sorghum and sweet rice flour instead of traditional wheat flour.

Although we are confident that this product does not contain gluten, the nature of our open concept kitchens and with dough made fresh daily, present possible flour cross-contamination and therefore gluten exposure.

Subsequently, this crust is NOT recommended for celiac disease sufferers or those customers with a moderate to high gluten intolerance or sensitivity.

This crust is free of all major allergens (dairy, eggs, soy, wheat/gluten, sulphite, shellfish, fish, peanuts, tree nuts, mustard seed & sesame seed).

Panago takes food safety and handling very seriously. Our restaurant staff receive a high level of training and there are several procedures in place to keep the potential for cross contamination at a minimum.

Please refer to the nutritional chart for a list of pizza recipes that contain gluten.

Here is a list of procedures in place to minimize cross-contamination:

- Special square screens have been provided to each store for cooking purposes of this organic gluten-smart crust only
- Clean knives are used for cutting this crust
- Cooking screens are kept in a sealed container when not being used
- Our organic gluten-smart crusts are kept in individually sealed packages and are not opened until the pizza is ordered
- The crust is square to be easily identifiable to all store staff
- Small stickers are adhered to all gluten-smart pizzas that leave the store to emphasize a potential risk to customers who may have gluten intolerances

Panago's Commitment to Health + Nutrition

We set ourselves apart by creating the finest flavours and sourcing the highest quality ingredients + we have a strict no artificial flavours or colours policy.

*All pizza serving sizes are based upon one medium slice.

Although the organic gluten-smart crust is entirely gluten-free, the nature of our operations and open-concept kitchens present inevitable flour cross-contamination and therefore gluten exposure. This crust is NOT recommended for celiac disease sufferers or those customers with a moderate to high gluten intolerance or sensitivity. Nutrition information for all Panago Pizza menu items is based on Panago standard recipes. Due to the handcrafted nature of these products, nutrient values may vary from those published here. New product introduction, ingredient changes or recipe changes during the life of this publication may cause this information to be incomplete. Panago nutritional values are generated through a standardized database. For the most up to date nutritional information please visit panago.com.

Winter 2021 Allergen Chart

We care about your health and any allergies or sensitivities you, or a member of your family, may have.

The following Allergen Chart lists food products that contain any of the allergens* which are estimated to cause more than 90% of all allergic reactions.

ALLERGENS	Peanuts*	Tree Nuts*	Milk & Milk Products	Eggs	Fish	Shellfish	Soy & Soy Products	Wheat & Gluten	Sesame Seeds	Naturally Occurring Sulphites	Mustard Seeds

*Panago uses only the finest ingredients available and our products have no added MSG, no artificial flavours or colours. All Panago products are rennet-free and we use real 2% partly skimmed, lower-fat, mozzarella cheese. Peanuts, peanut oil and tree nuts are not used in any Panago products. As all products are prepared in an open-kitchen environment, we cannot guarantee a 100% allergen-free environment. Allergen information is based on standard Panago recipes and is compiled from product information provided by our approved food suppliers and further based on standard product formulations. This chart is complete at the time of publication, January 2021. New product introduction, ingredient and/or recipe changes may cause this chart to become obsolete – please continue to check for updates or contact customercare@panago.com.

**Peas are legumes. People with severe allergies to legumes, like peanuts, should be cautious when introducing pea protein into their diet because of the possibility of a pea allergy. Contains no peanuts or tree nuts.
